

Environmental Policy

Company Business Mission

To provide battery management solutions for battery backup systems to ensure that they perform when called upon and to maximise the useful life of the batteries thereby minimizing environmental impact.

Commitment to the Environment and Objectives

We will comply with all relevant regulations and are committed to continual improvement and prevention of pollution by implementation of environment systems. This includes reducing the use of power and water and waste output from day to day operations. Resources will be provided to monitor water and power usage. We will identify harmful chemicals used and move to environmentally friendly alternatives. We will ensure our product complies with international environmental standards.

Company Standards and Commitment

Advise staff of the environmental policy and encourage them to recommend improvements. Suppliers will be advised of our policies and requested to provide their policies. Measure implementation of recycling initiatives.

Waste Minimisation and Resource Efficiency

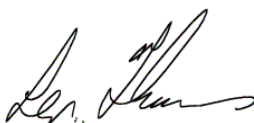

Reduce waste at source in all operations, encourage creative "reduce/reuse/recycle" of waste materials generated in the office and dispatch (reuse packaging received from incoming goods).

Risk Assessment, Pollution Prevention, Environmental Protection

Understand direct and indirect impacts that business activities and productions may have on the environment. Identify potential areas of concern and develop proactive responses including for emergency situations.

Chemical Use

Identify chemicals used and move to environmentally friendly alternatives.
