

# Product Life Announcement

Date: 14 August 2019

Dear PowerShield Customer,

This notice is to inform you that the Sentinel system has been phased out of production. The Sentinel system has been fully superseded by the *PowerShield 8* system which was released in 2017.

Sentinel system spare parts, repair, service and technical support will be available until December 2026 through the PowerShield factory.

Legacy quotations and specific project requirements for full Sentinel systems may be supported at PowerShield discretion, however prices may be at a premium.

PowerShield recommends selection of *PowerShield 8* for all new projects.
